A VALUABLE BOOK.

HAND-BOOK OF UNIVERSAL LITERATURE: in the Best sus Latest Authorities. Designed for Po-Reading, and as Text-Book for Schools and Colleges. By ANNE C. LYNCH BOTTA. 12mo \$1.25.

From The Evening Post.

"So far as we know this is the first manual of the kind—the first general survey of the literature of all nations and all ages intended as a book of reference and for popular reading—that has been produced in our language. "Mrs. Botts has produced a work which is valuable as a panoramic survey of all that the human mind has accomplished in its noblest department of activity. We have universal histories, which are a record of wars and revolutions of changes of government and of the succession of dynasties; this book is the universal history of man's cultivated intellect—a record of triumbus achieved by the reason and the imagination in all lands and all ages of the world."

"It is especially worthy of the attention of teachers, as advirably fitted to be used as a class book in schools. Not so concles as to be dry, nor extended to prolicity, it is instructive and interesting, and will give the scholar an admirable view of general literature. Its merits are of a high order, being the fruit of many years' study and great familiarity with the subject so successfully treated.
